

Neural Pocket

Financial Results Briefing Material FY2022 Q3 (ended Sep 30th, 2022)

Neural Pocket Inc.
Nov 11th, 2022

Translation of original Japanese version

Key highlights for FY2022 Q3 (ended Sep.)

Net sales
+141% growth

Q1-Q3 cumulative net sales
YoY growth

Quarterly financials
turned **Black**

EBITDA & Net Income

**Overseas
expansion**

Launched smart city biz in SE
Asia with Thailand entry

Post M&A
Synergy creation

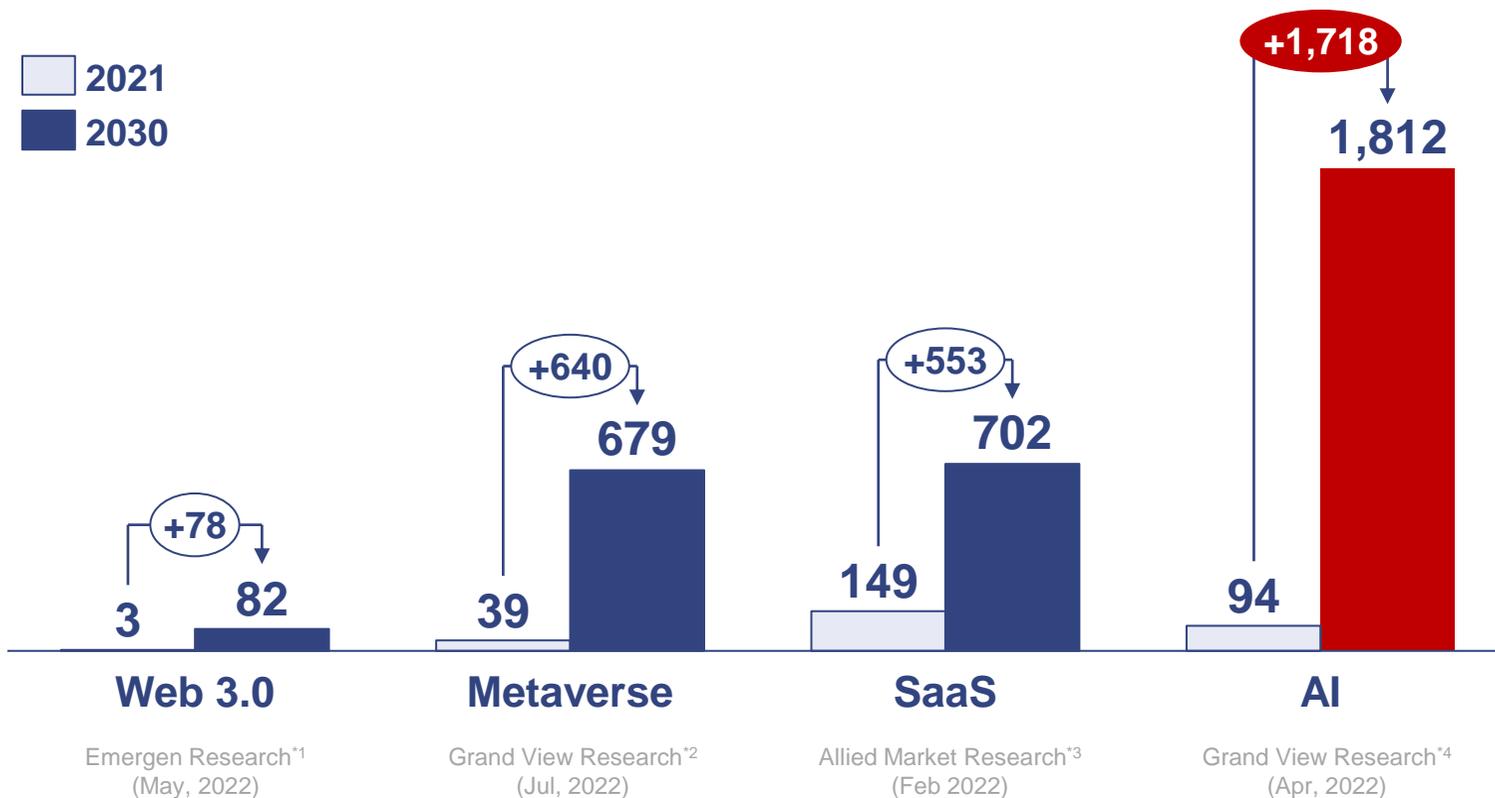

Continued growth of Neural
Marketing post Feb. acquisition

- **AI Industry Trend and Company Advantage**
- FY2022 Q3 Highlights
- Service Progress

AI industry is expected to grow to an overwhelming market size compared to other growth areas

Global market size comparison

(Billion USD)

*1 Emergen Research, Web3.0 Market Size, Share, Trends (May, 2022)

*2 Grand View Research, Metaverse Market Size, Share & Trends Analysis Report (Jul, 2022)

*3 Allied Market Research, Software As A Service (SaaS) Market Statistics: 2030 (Feb, 2022)

*4 Grand View Research, Artificial Intelligence Market Size, Share & Trends Analysis Report (Apr, 2022)

The AI industry is shifting from selling “AI tech itself“ to selling “AI-enabled services”

AI tech provider : Selling AI itself

Project commission from clients

AI tech experiments

Sales of AI licenses

Revenue share

Catering to the needs of individual companies, providing customized technology

AI service provider : AI-enabled services

Various AI tech

100% standard accuracy

24/ 365 operations

Expansion of use cases

Data versatility

Easy installation and pricing

Security and privacy

Customer satisfaction

Scaling of AI services that address society's pain points

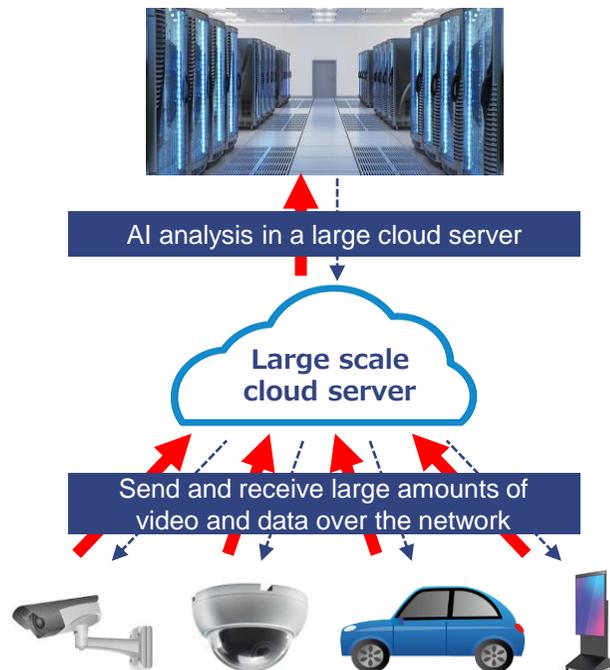

- High AI accuracy and quality are prerequisites
- AI engines utilized for long-term actual operations with reliability
- Services are used by consumers daily and unconsciously

Our company's focus

AI technology is evolving along with the industry's growth

Cloud AI

Conventional approach

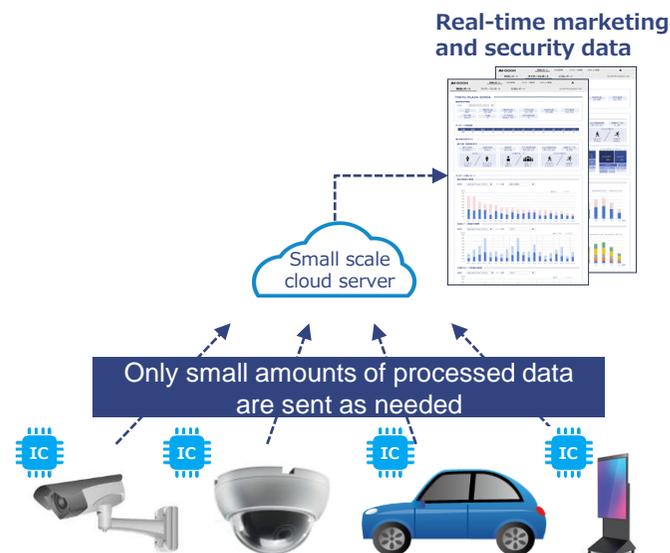

- **High costs** (Communication and maintenance)
- **High latency** (High network load)
- **High electricity consumption**

Edge AI

Our approach

- Original data (video, etc.) before AI analysis
- Metadata after AI analysis (text data)

- **Low costs**
- **Low latency**
- **Green/ low electricity consumption**

Also greatly contributes to privacy protection

Adoption of edge AI technology is accelerating at many global leading companies

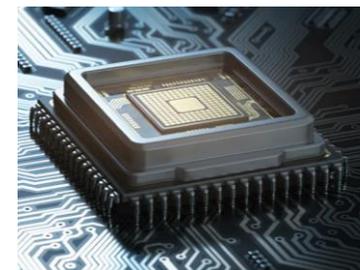

Accelerate development of edge devices for autonomous driving to achieve low latency and safety unaffected by the communication environment.

NVIDIA DRIVE AGX Xavier

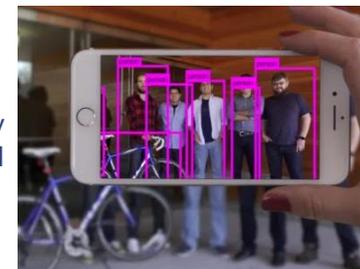

Ethos NPU series, Edge-oriented chips specializing in deep learning to achieve high-speed inference with low power consumption.

Many research results of edge AI for low latency processing of metaverse equipment.

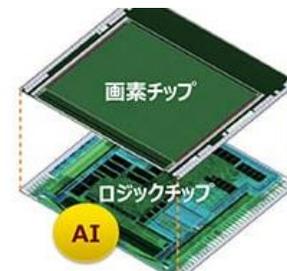

Acquired XNOR.ai, a company with technology for high-speed AI execution on edge devices, for USD 200 million.

Dedicated Edge AI chips are standard in smartphones, and their performance is advancing every year.

Practical application of image sensor-integrated edge AI chip for real-time image recognition and metadata conversion.

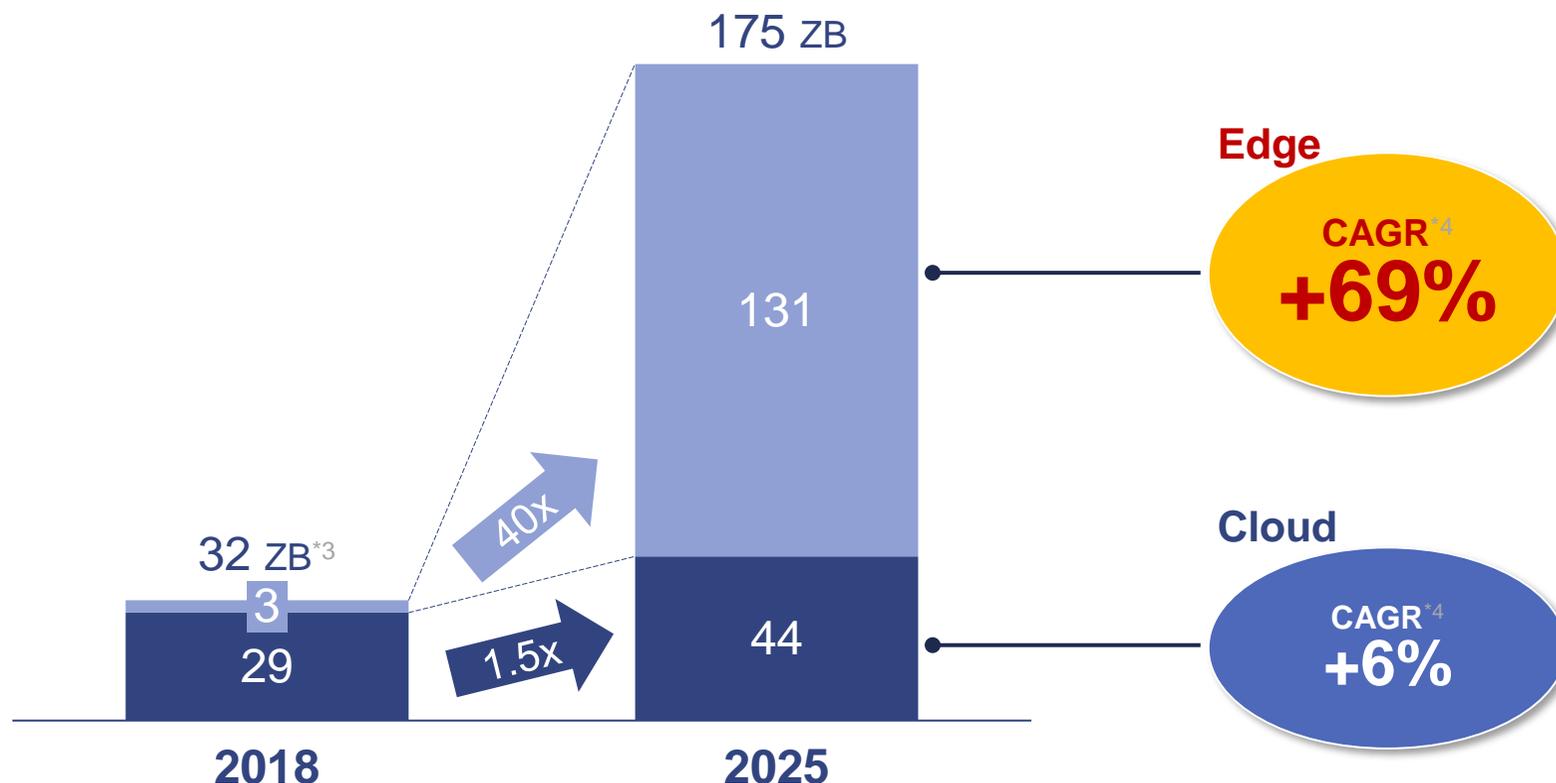

Edge processing is rapidly expanding

Total data processed at the edge vs in the cloud^{*1*2}

Through 2018 to 2025

Growth forecast

Through 2018 to 2025

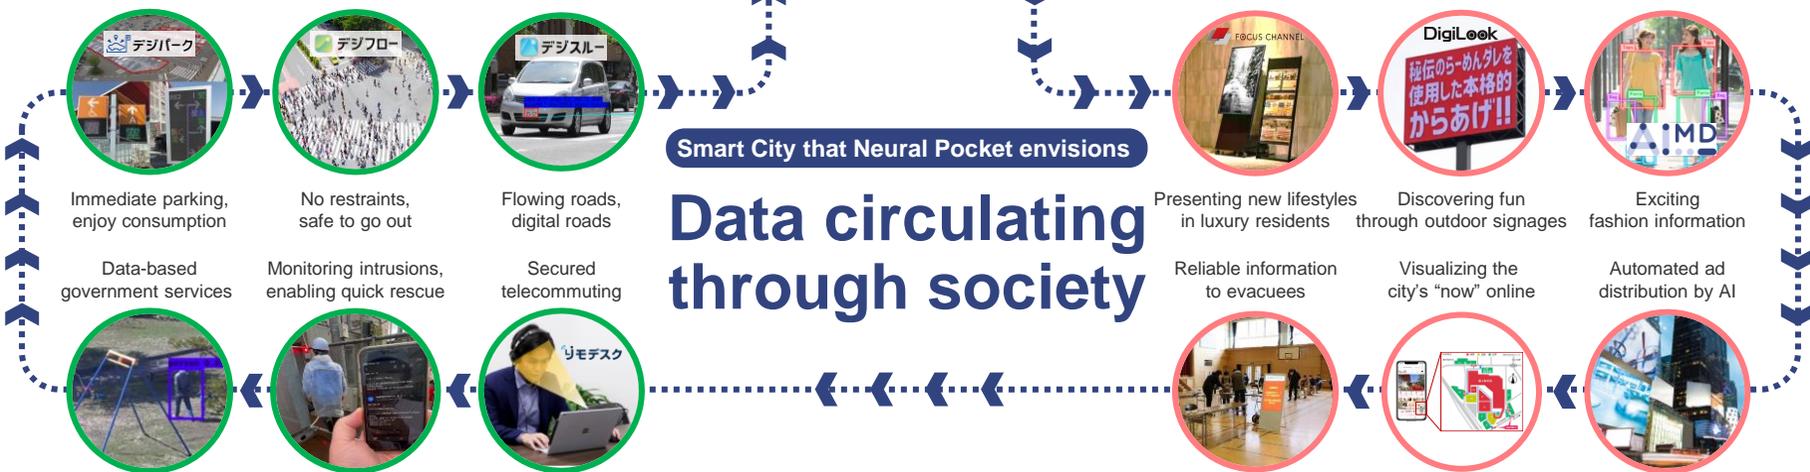

*1 Source for Edge share: What Edge Computing Means for Infrastructure and Operations Leaders, Gartner (Oct 2018).

*2 Source for amount of data: Data Age 2025 Whitepaper, IDC (Nov 2018), accounts for all data created, captured, and replicated globally.

*3 Zetabyte. Unit of data. Equivalent to 10⁹ TB (terabyte).

*4 Compound annual growth rate.

We enable smart cities with edge AI – Our edge AI platform allows for the circulation and utilization of data in physical spaces

Smart city we are creating: 1

Eliminating waiting time

Data analysis using AI technology allowing for fun and peace of mind

Smart city we are creating: 2

Encountering information

Information delivery customized to local regions and individuals, with AI-enabled viewer behavior analysis and automatic distribution

Neural Platform is a comprehensive environment to facilitate AI software development and day-to-day operations

Functions		Image and overview	
Service, application building features	AI service mgnm't	 <ul style="list-style-type: none"> Manage and provide AI services (AI models), such as people flow analysis and vehicle analysis, with a smartphone app store approach Services can be easily uploaded as developers updates the AI program 	Equipment mngm't, alive monitoring <ul style="list-style-type: none"> Real-time management of operational (alive/ dead) status of edge devices Operational status and error logs of AI services in each device managed
	AI dev. environ.	 <ul style="list-style-type: none"> Development environment for internal and external developers to conduct AI dev. (annotation, model selection, training etc.) Application dev. environment to run on various edge devices and apps, as well as smartphones 	
Content application functions	Content play and display (CMS)	 <ul style="list-style-type: none"> Programs to play content (text, photos, video, audio, etc.) essential to AI services Information communicated in real time through LTE network to and from edge devices. 	Security ware <ul style="list-style-type: none"> Prevent attacks on edge devices by diagnosing security vulnerabilities for h/w and s/w Encrypt data and communications and monitors attacks Automatic video deletion for privacy protection
	Data analysis	 <ul style="list-style-type: none"> Stores data sent from edge devices and analyzes data to influence people's behavior. Various display formats, enabling data analysis to be conveniently performed on a web browser. 	

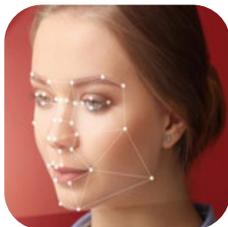

Neural Pocket possesses proprietary AI libraries/ technologies to enable the AI-ization of society and smart cities

i: Smart City Concept for the development of Bangsoo Station area; ii: AMATA Chonburi Gateway R&D Hub aiming to become a smart city; iii: One Bangkok Project, all of which are examples of smart cities to be developed in Thailand.

1: "Toward Overseas Urban Development Business Development - Smart City Business Creation", Nomura Research Institute, Ltd. presentation (December 16, 2014).

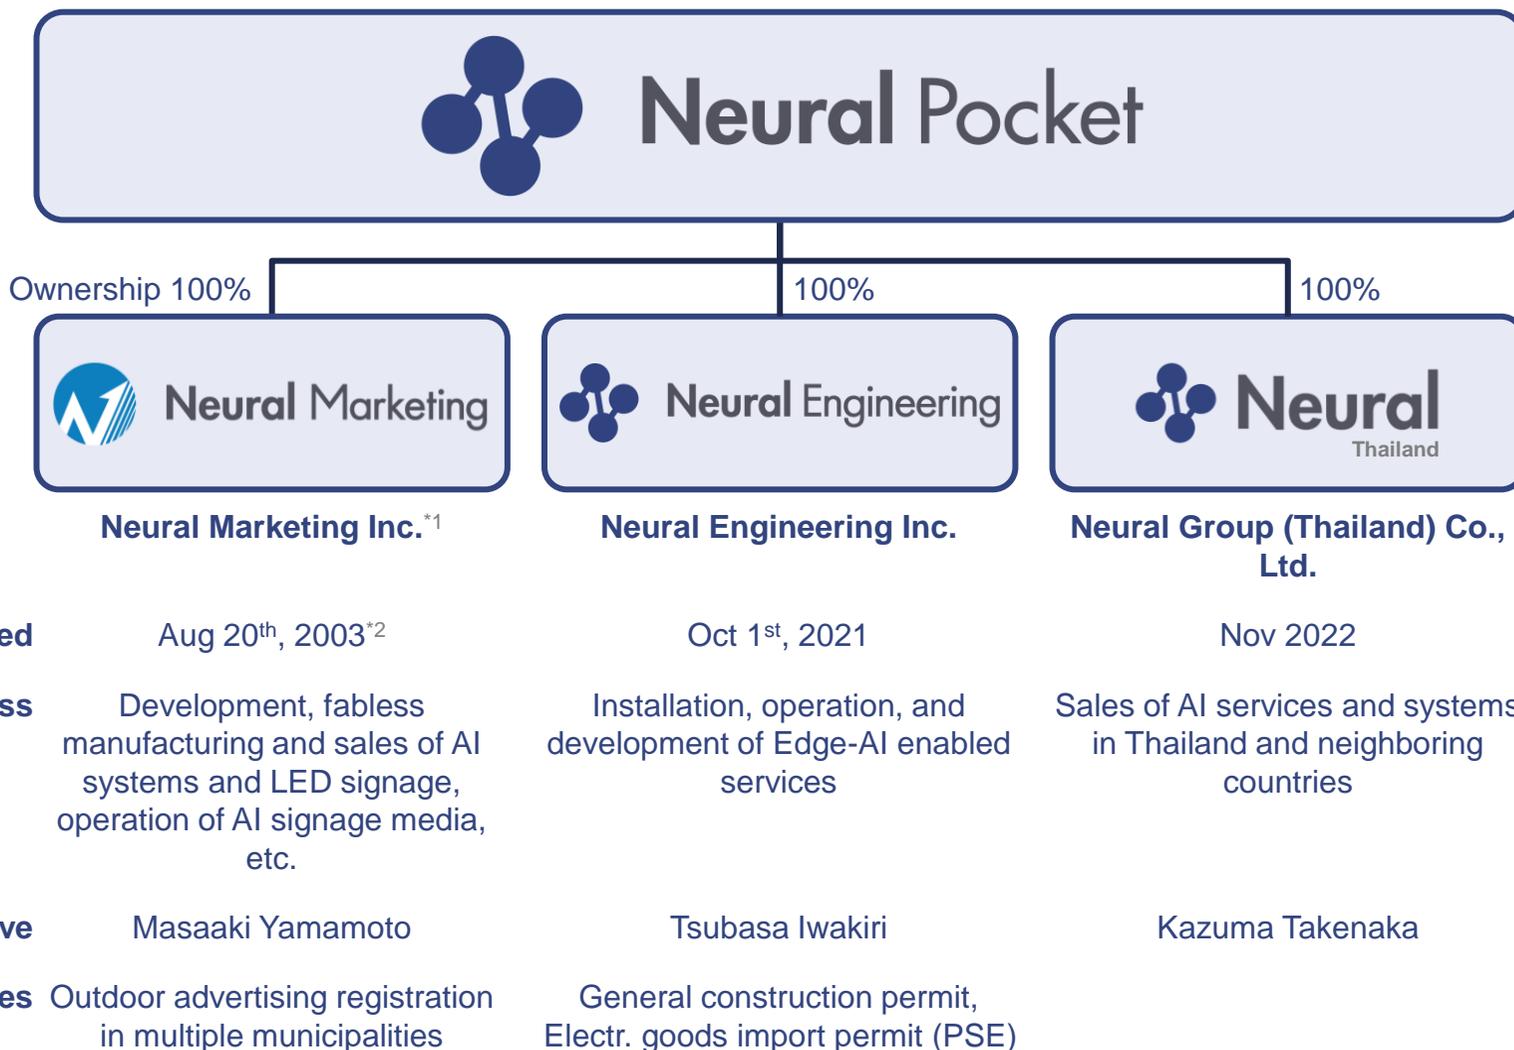

Edge AI is a critical technology to comply with the newly enacted Personal Data Protection Act (Jun 2022) in Thailand

- The Personal Data Protection Act (PDPA^{*1}) came into effect in Thailand on June 1, 2022, mandating operators to be responsible for the management and processing of personal data and must receive the consent of the data owner before collecting, using and disclosing such personal data
- Notifying the reason and purpose of personal information usage is required, posing challenges for conventional cloud AI

Neural Pocket Group operates 14 locations internationally, possessing the necessary infrastructure to support the development of smart cities

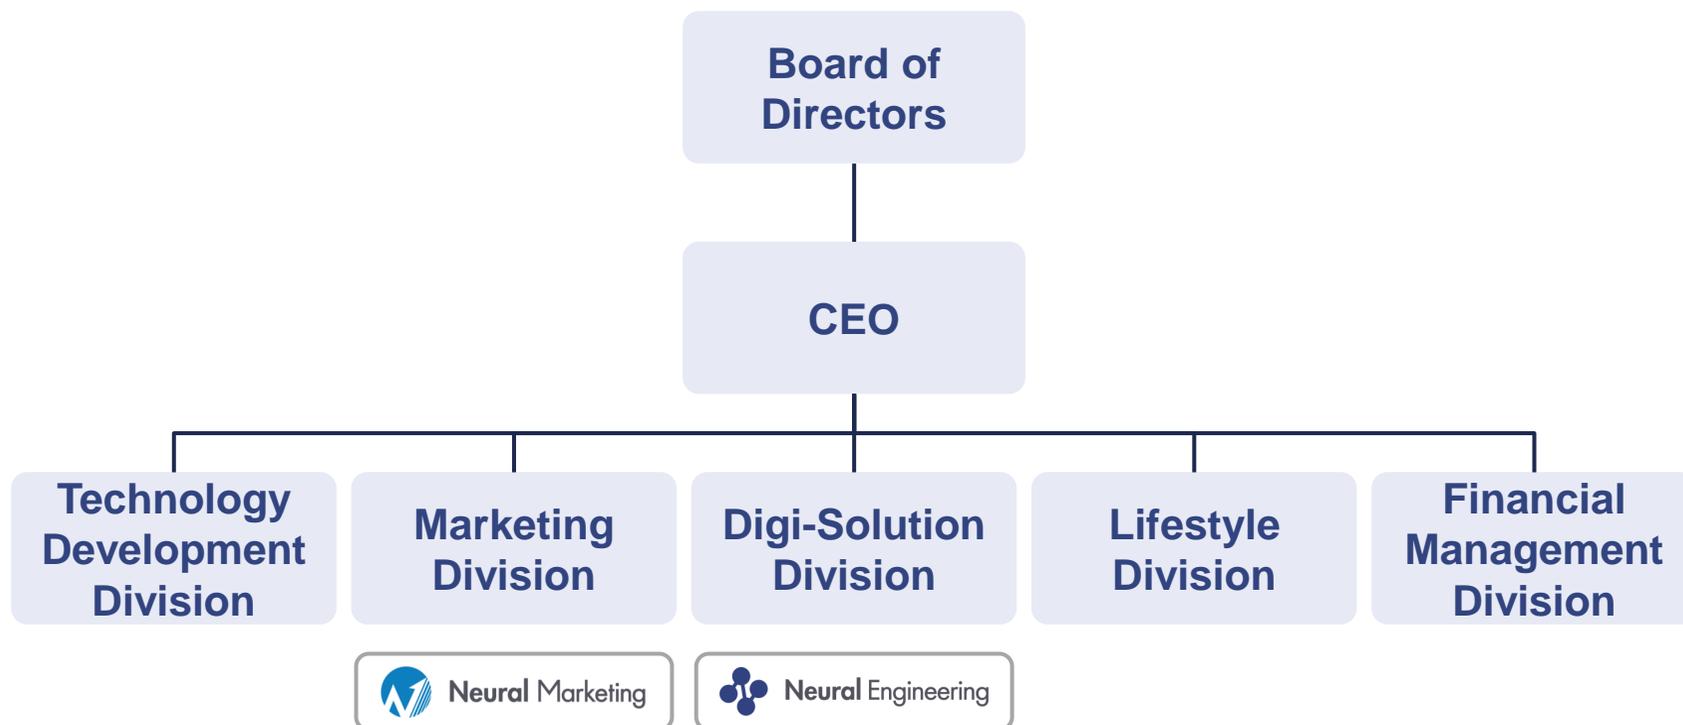

*1 Neural Engineering Inc. is established within Neural Pocket Inc. Tokyo HQ.

*2 NETTEN Inc. and Focus Channel Inc. have been consolidated on Aug 1st, 2022. Subsequently the corporate name has been changed to Neural Marketing Inc.

*3 Neural Group (Thailand) Co., Ltd. established in Nov. 2022

Org structure (as of Sep. 30th, 2022)

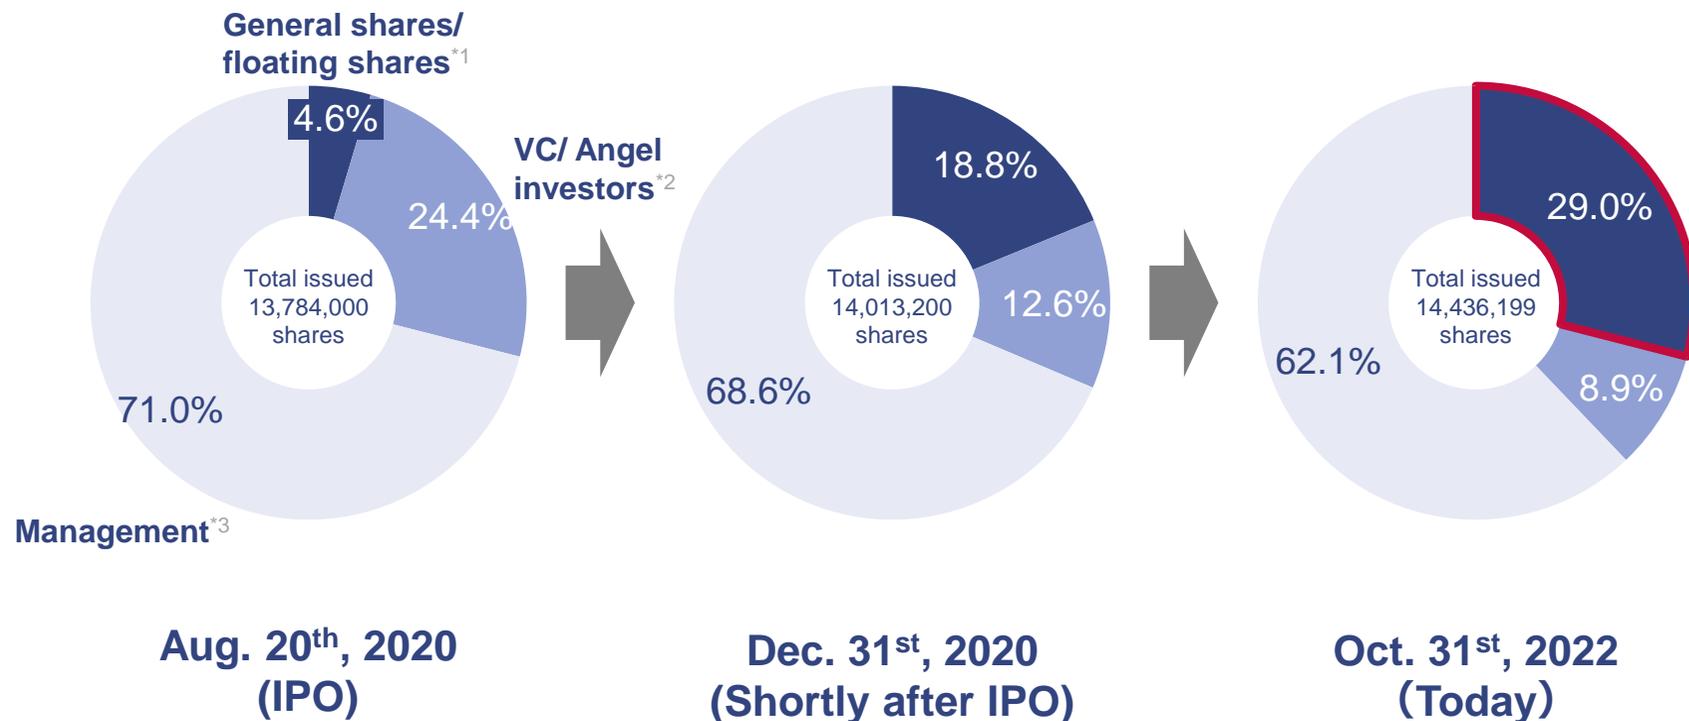

- Current org structure allows for different business divisions to pursue scale, independent of each other
- Broad executive team in place to lead each of the divisions

Our management team

	Name	Career overview
Board Directors	 <p>CEO Roi Shigematsu</p>	Former Partner at McKinsey, working in 11 countries including Japan, Germany, and the U.S as leader in IoT and AI field. Founded Neural Pocket in January 2018 with the goal of realizing the digitization of the real world through AI. He holds a Master's degree in Engineering from the University of Tokyo and is currently a member of the Advisory Board of the School of Engineering.
	 <p>CTO Yuichi Sasaki</p>	Worked on the discovery of the Higgs boson at CERN in Switzerland. After working for an AI venture, he joined Neural Pocket. He reads more than 1,000 research papers per year in a wide range of research fields and contributes to the development of the latest technologies. He is a driving force behind the company's research and development. Doctor of Science, University of Tokyo.
	 <p>CFO Ryosuke Tane</p>	He was engaged in private equity investing at Bain Capital Japan. After serving as the Tokyo General Manager of Oyo Technology and Hospitality Japan, he joined Neural Pocket. He oversees finance, M&A, and corporate affairs across the Neural Pocket Group. He holds an MBA from Stanford University's Graduate School of Business.
	 <p>External Director Yoichi Yamagishi</p>	After working in the investment banking division of Nomura Securities Co., Ltd. in M&A advisory and public underwriting, he was appointed as General Manager of Public Underwriting Department of Mizuho Securities Co. After retiring from Mizuho Securities, he served as an outside director of D.L.E. Inc. and Laox Co. He is a certified public accountant.
	 <p>External Director Maiko Hasumi</p>	After working for Fuji Television Network, Inc. and Fidelity Investment Trust Co. currently fund manager at Ever Rich Asset Management. Currently director and member of the Audit Committee of Z Holdings Corporation (formerly Yahoo! Japan), etc. Appointed outside director of Neural Pocket in 2021. Holds an MBA from Stanford University's Graduate School of Business.
Auditors	 <p>Full-time auditor Miho Takemura</p>	After working at Ernst & Young Shin Nihon LLC (EY Ernst & Young Shin Nihon LLC), where she mainly audited securities companies and other financial institutions, she worked as a full-time auditor at IRIDGE Co. Certified public accountant.
	 <p>Auditor Toshiki Wakamatsu</p>	After working at Sato Sogo Law Office, he opened Saltus Law Office. He has served as a director of Orchestra Holdings Inc. and Voicy Inc. and has been a corporate auditor of Neural Pocket since 2019. Attorney. Specializes in a wide range of corporate legal matters, including corporate law and the FIEA.
	 <p>Auditor Hajime Shirai</p>	After working at Arata Audit Corporation (PwC Arata LLC), Frontier Management Inc. and Deloitte Touche Tohmatsu LLC, he established Grintee Inc. Ltd. Appointed as a corporate auditor of Neural Pocket in 2020. Certified public accountant.
Advisor	 <p>Prof. Yutaka Matsuo</p>	Professor at the Artificial Intelligence Research Center, Graduate School of Engineering, the University of Tokyo. He is a leading expert in the field of AI and deep learning in Japan. He is also the chairman of the board of the Japan Deep Learning Association and an outside director of Softbank Group Corp.

General shares/ floating shares increasing since IPO (as of Oct. 31st, 2022)

*1 Sum of 415,000 publicly offered shares upon IPO, 215,800 sold shares during IPO (including over-allotment), and shares sold by pre-IPO investors (e.g., VC investors, angel investors) and management that the company is aware of.

*2 Shares held by pre-IPO investors (e.g., VC investors, Angel investors).

*3 Shares held by internal board directors.

Digi-Solutions service lineup – Providing various packaged AI services

Digi Park

Parking management system to eliminate waiting time

Digi Thru

Visualization of vehicles through license plate analysis

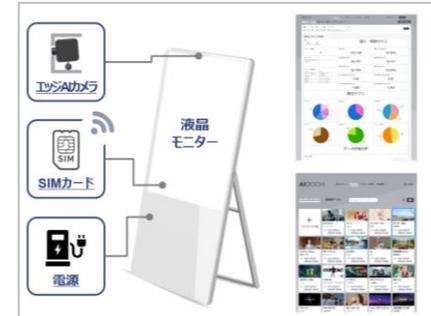

Digi Flow

Visualization of people flow for improved facility operations

SIGN DIGI

Ready-to-install AI signage with viewership and audience detection

RemoDesk

Security risk management to enable work-from-home call center operations

DigiLook

Outdoor LED signage for retail stores to large public facilities

FOCUS CHANNEL

High-end apartment digital signage advertising for 150K+ residents

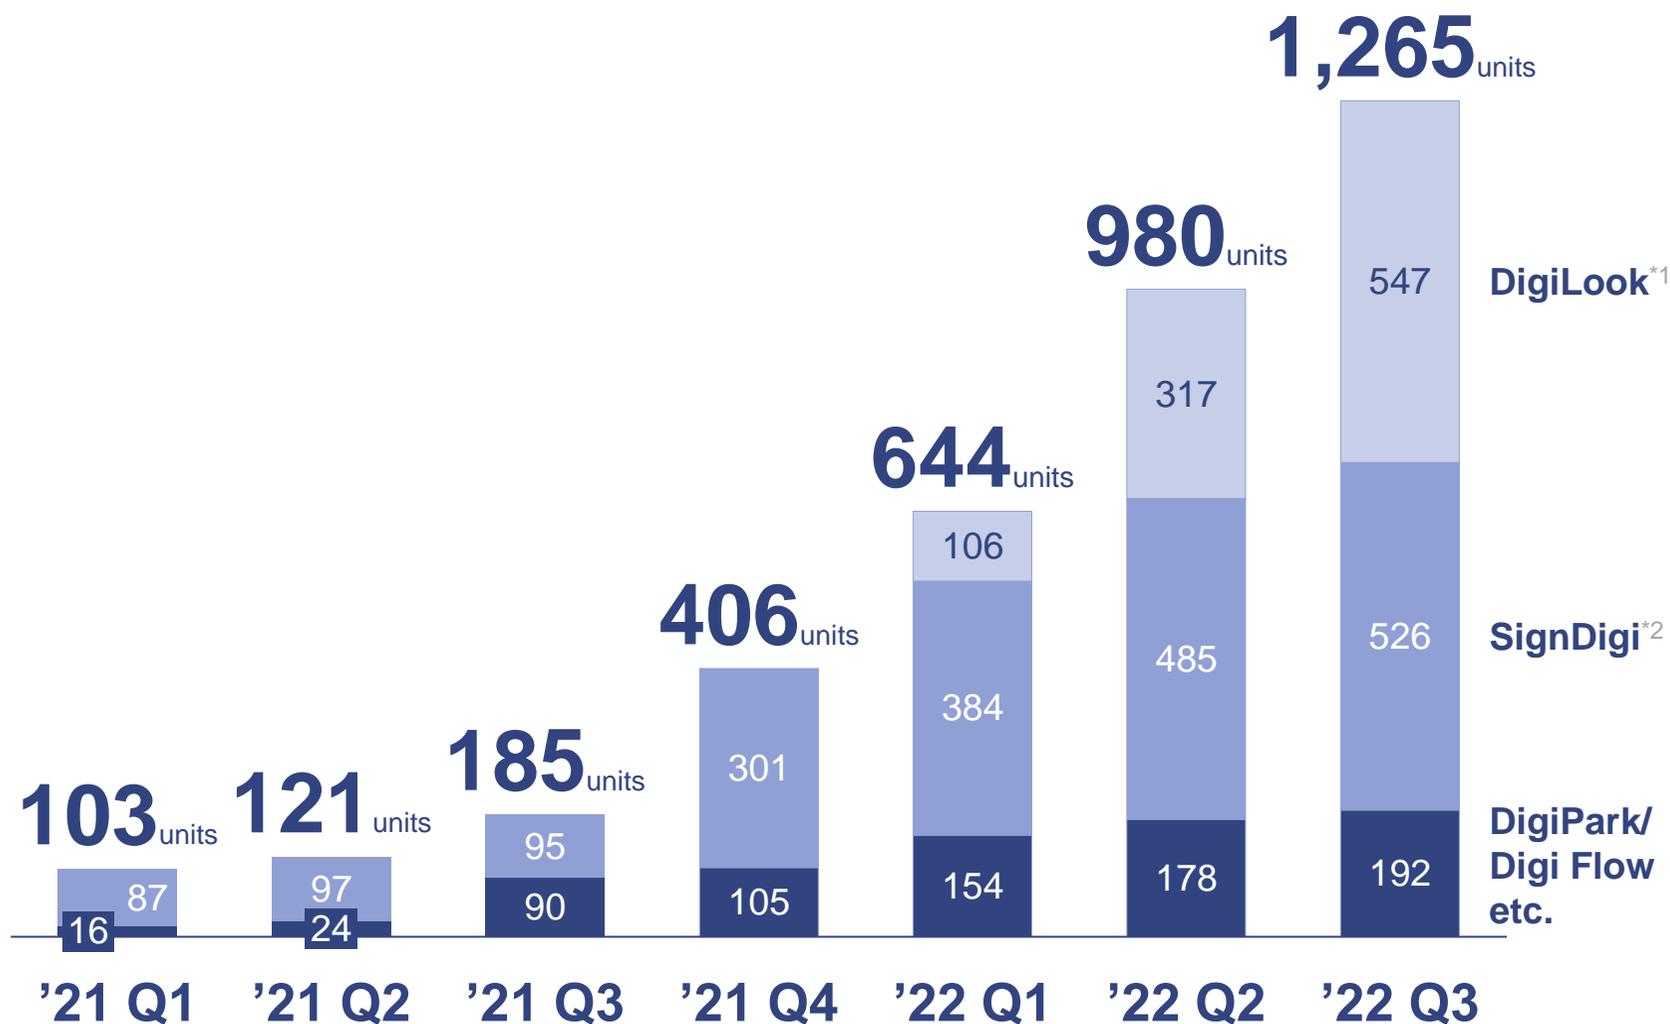

Other new services

Various proprietary services utilizing edge AI (e.g., Intrusion detection)

Digi-Solutions unit installation trajectory (Cumulative)

^{*1} LED signages installed by Neural Marketing Inc., post acquisition by Neural Pocket. ^{*2} Mainly Focus Channel digital signages installed in apartments. Also includes other signages installed for commercial use or trial installations unrelated to Focus Channel.

Mitsubishi Estate: Detection of people flow across 3 major buildings in Marunouchi

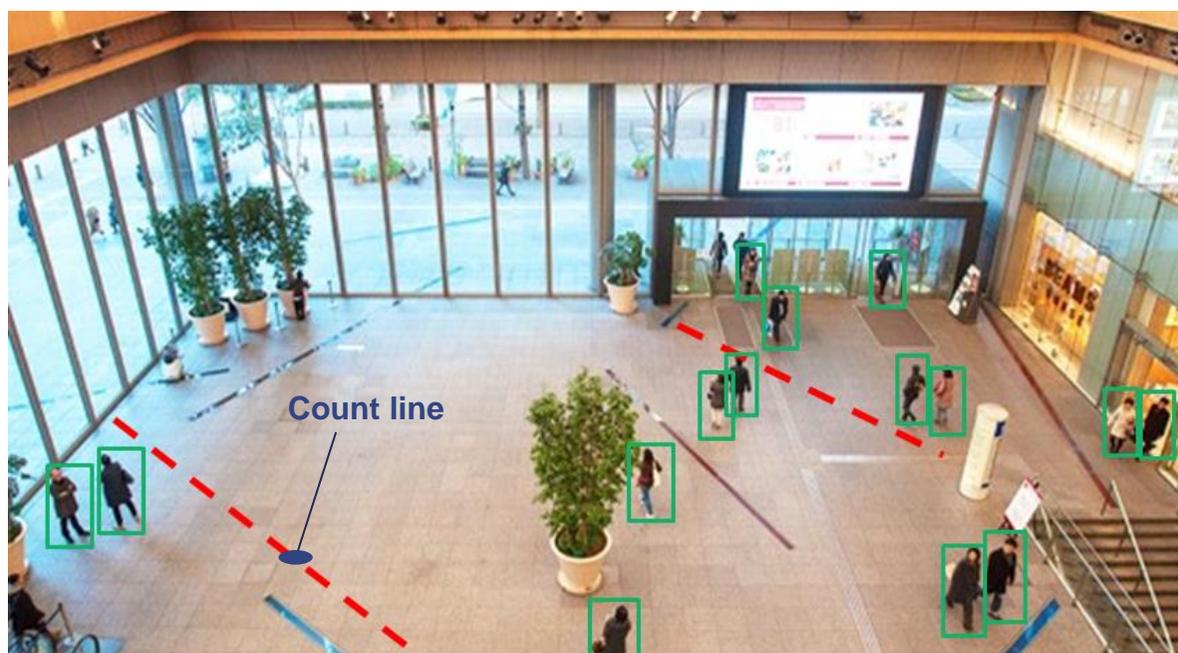

Total guest count and the number of guests staying within the building at any given time is visualized. Edge AI processors were connected to existing surveillance cameras across events spaces, entrances and exits, and escalator entrances across three buildings. In addition, by linking such data with Mitsubishi Estate's database, they can now analyze the impact of events, layout, and seasonal changes on the flow of people within the building.

Marunouchi Building where Digi-Flow was introduced*1

Detection of people flow within Marunouchi Building. Digi-Flow is installed in more than 25 locations, mainly at entrances and exits, across three buildings.

Visualization of guest count, number of guests within the building, and traffic direction through Edge AI cameras

古澤様の自己紹介をお願いします。

東京建物株式会社
新規事業開発部 事業開発グループ 課長
古澤 隆一さん

オープンイノベーションの担当として、現場のニーズを吸い上げ、適切なスタートアップを紹介する仕事をしていました。

デジパークの導入効果はねらい通りでしたか？

上：LEDサインージ
下：満空表示灯

ショッピングセンターでは、お客様ができるだけ施設に近い場所に駐車をされようとして駐車場で滞留してしまうことがあります。その結果、駐車場内の交通量が余計に増えてしまったり、特定のエリアだけ混雑したりという課題が発生します。

デジパークを導入したことにより、来訪した車両がスムーズに空き車室に移動していただけるようになりました。満空灯とLEDサインージを見て、どこが空いているのかが一目で分かるようになったところが多いです。お客様が情報を能動的に探すのではなく、パッと見て受動的にわかるようになったとご好評いただいています。

デジパークによってストレスなくスムーズに駐車された上で、気持ちよく施設内での買い物が始められるというのは、巡り巡って売上向上にも繋がっていくのではないかと考えています。

お客様の誘導だけでなく、駐車場の利用状況に関するデータも取得できていますが、その活用についてお考えのことはありますか？

現場で感覚的に理解されていたことも、これまではデータという裏付けがありませんでした。それが定量的に把握できるようになったことは重要だと思います。デジパークの管理者用ダッシュボードでは、あらかじめ定めた区画ごとに時間帯別の混雑度が分かります。これと施設内の状況を照らし合わせて分析し、何か対応できることはないか、といったことを今後検討していきます。

上：サマリ画面イメージ
下：レポート画面イメージ

例えば、イベントがあるときに通常の駐車場利用と異なる利用のされ方を示す傾向があった場合、誘導員の配置や警備の巡回ルートを変更して業務を効率化するといった判断を、データをもとに関係者が納得した上で行えるようになるのではないかと考えています。

また、データをどう活用するかを事前に絞るのではなく、日々変化する施設の状況に応じて、駐車場がどのように利用されているかというデータを見返すことで、新しい気づきが生まれるといった循環ができていくのではないかと思います。

Enhancing customer experience and operations every day in large parking lots

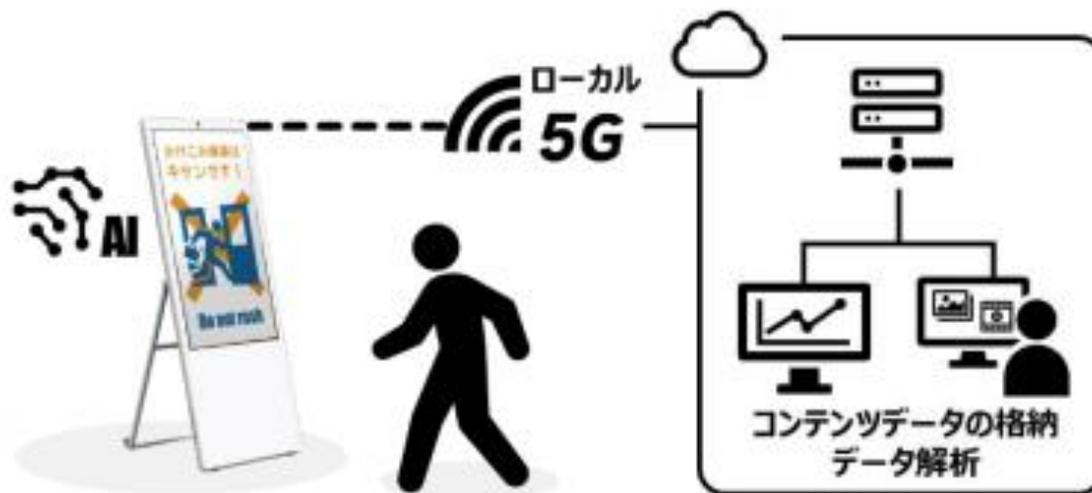

Oedo Line Tochomae Station: Installation of AI signages using local 5G

【Overview】

- Joint initiative with **JTOWER**, **NTT East**, and **FCNT** to verify use cases of new digital technology in train stations using **5G technology**
- Installed AI signage in stations to broadcast information to commuters and measure viewing data through using built-in camera
- Accelerating **digitalization of operations** through flexible and efficient information transmission within public facilities

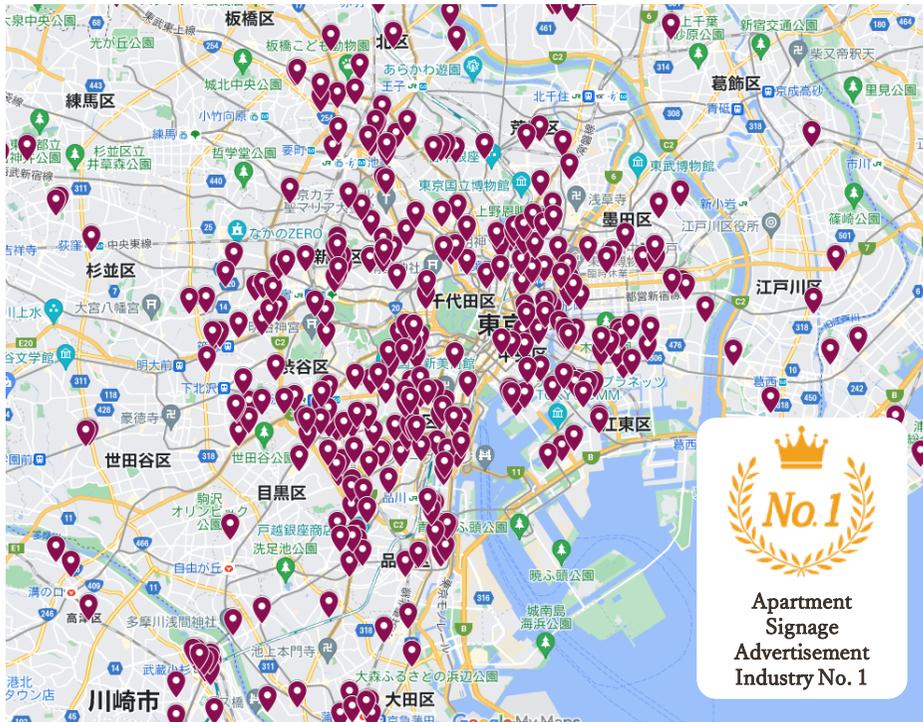

【Going forward】

- Further collaboration to install 5G solutions to railway-related facilities nationwide

Focus Chanel: Media overview

Reach approx. 190K affluent consumers/ residents in the metropolitan area

- **# of views (Impressions)**
Stable reach even during Covid
- **View frequency**
Located in living spaces and repeatedly views by all residents (1.5 million estimated monthly view count per program)
- **Targeting**
Focused on high-grade condominiums where affluent consumers reside

👉 A differentiated media that repeatedly and stably appeals to residents of city-central apartments, whose attributes are well-defined. We have already achieved the largest share of digital signages within apartments, with a reach of approximately 190,000 residents, mainly in the Tokyo metropolitan area.

Delivering content that enhances residents' lifestyles

Broadcasting lifestyle-oriented content targeting affluent residents

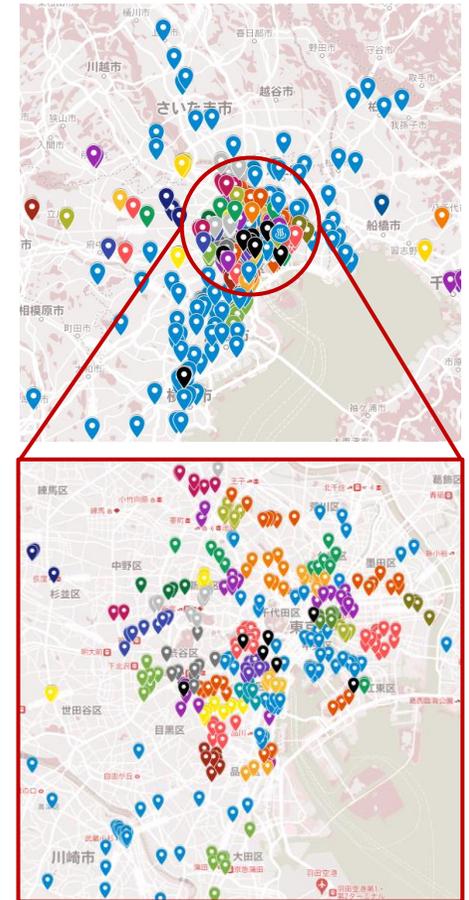

Varon
(Men's skincare)

Nosh
(Delivery healthy foods)

Mitsui Sumitomo
Card
(Credit card)

ZAMET
(Golf studio)

Area-specified ads

Initiated area-specific ads in central Tokyo with updated CMS system, enabling local targeting

Announced collaboration with GROWTH taxi media

GROWTH

THE TOKYO TAXI VISION

- Start of collaboration with "THE TOKYO TAXI VISION GROWTH" (operated by News Technology Co., Ltd.), one of the largest taxi signage media in Japan
- Started sales of "Executive Reach Plan," delivering information from living spaces to mobile spaces targeting affluent people in Tokyo
- Also offering tie-up advertisements with GROWTH's original information program, HEADLIGHT
